SUMMARY OF INFORMATION

SG1A

The vessel known as the is currently located at *about 120* 26 Degrees North, 75 Degrees West which is *of Abaco Island in* ~~200~~ miles east of the Bahamas. It is enroute to a location immediately east of Cape Caneveral where it will off load some of the drugs onto a larger *the* ~~vehicle~~ vehicle, a "streamliner." This liner will unload the drugs ~~in~~ in Richmond, Virginia.

A second destination for the drugs is at geographical coordinates 39 Degrees North 121 Degrees 30 Minutes West which is located in a vicinity northwest of Sacramento, California. A small aircraft may be involved in the transportation of the drugs in this second destination.

(Vicinity of the 50 mi sandy area Forest Hill)

SUMMARY OF INFORMATION:

SG1A

1. (S/STD) Determine if the is carrying contraband in the form of drugs: Yes.
2. (S/STD) Describe the nature of the drugs: The drugs are thin, flat rectangular "pieces" (approx. 5" X 2.5" X .5") of black, sticky-looking (shiny surfaced) material.
- 3A. (S/STD) Describe how the drugs are wrapped: The drugs are located inside a single heavy paper-board box which is dull black in color. The box is approximately 18" X 30" X 7" in size. The "pieces" are lined up neatly in the box in rows and layers (see Fig. 1). The "pieces" are not wrapped individually, but are simply placed into the box together.
- 3B. (S/STD) Where are they stored aboard ship?: The box of "pieces" are stored in a storage compartment in the prow of the boat (see Fig. 2). It is crammed into this area with clothes, suitcases, gear, etc. Within this area, it is sitting vertically toward the very front, and high in the pile of stuff, directly under the boards of the decking.

SUMMARY OF INFORMATION

The target ship is a masted vessel with a dark green almost black hull. The rigging on the vessel is white with white sails and a white band around the ship just below the hand railing.

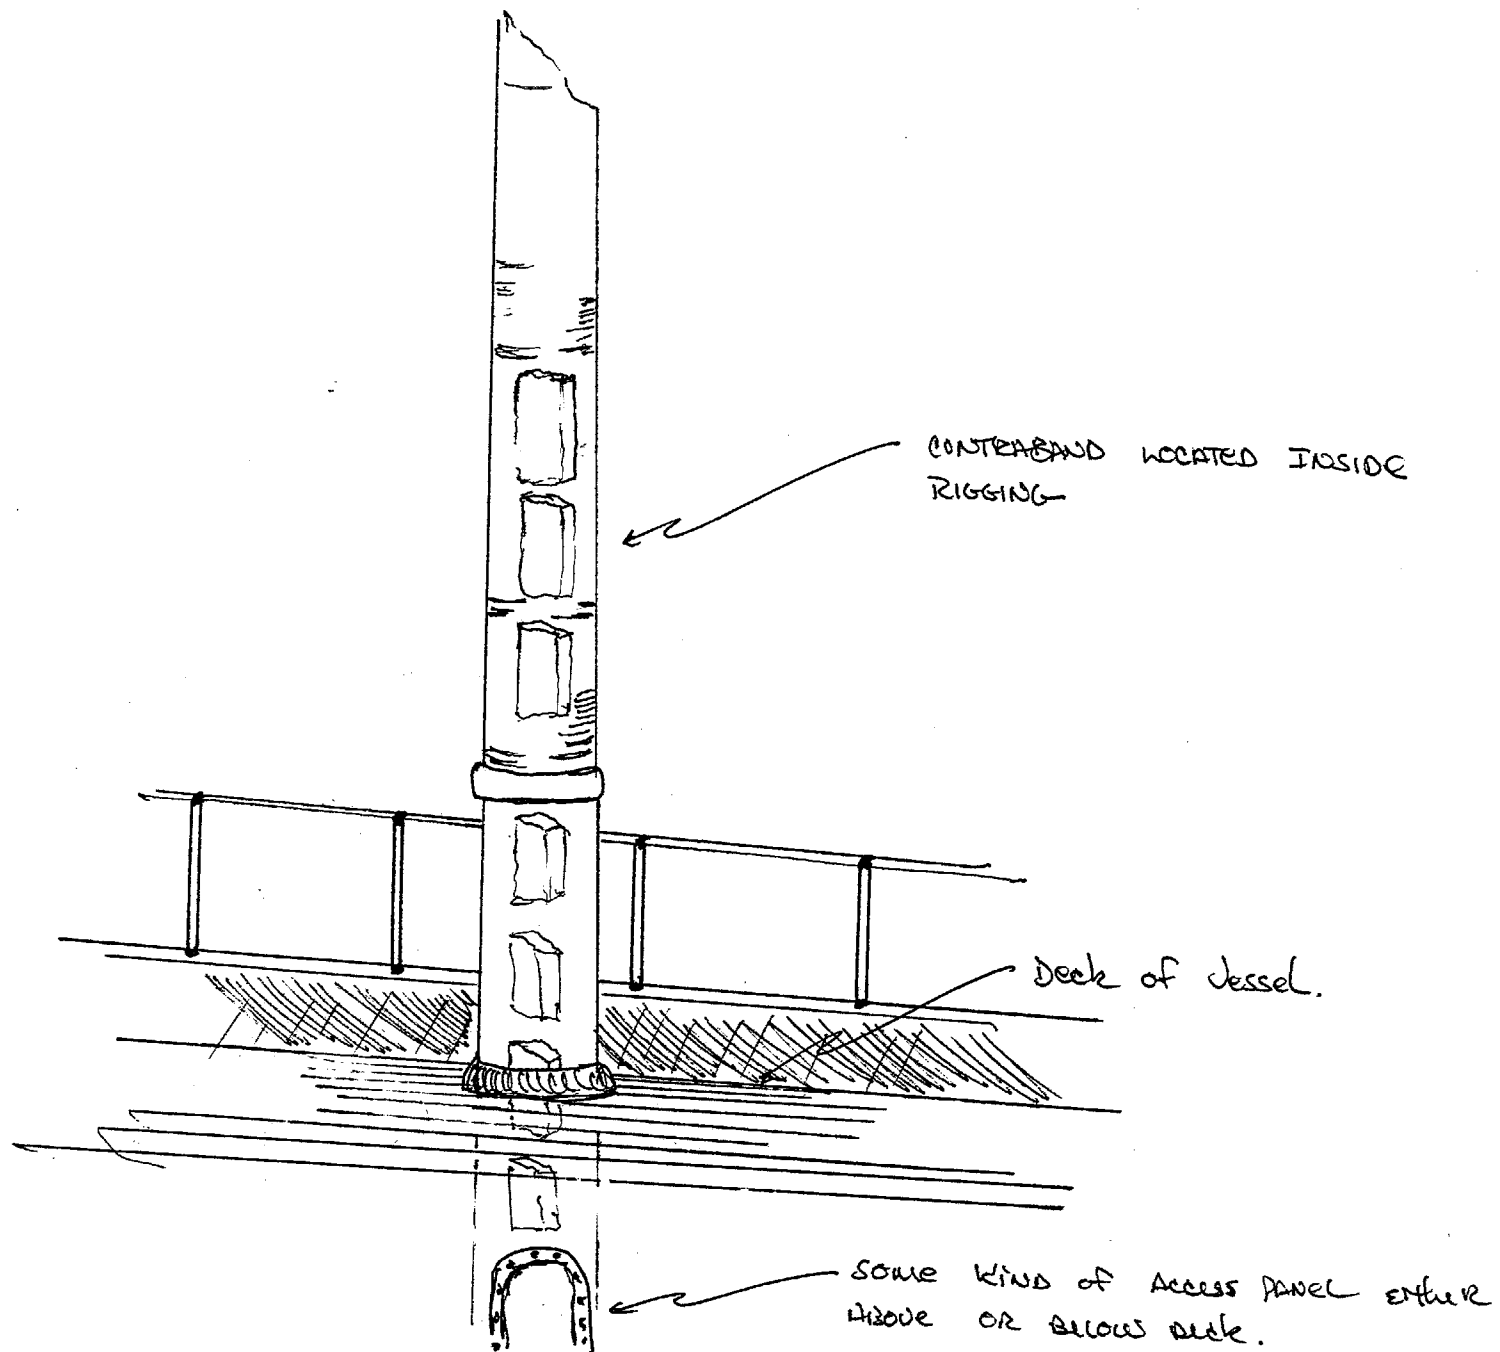

The ship was in for repairs recently and during that time the contraband was positioned. I perceived the contraband being positioned inside the masts -- they are hollow and appear to be made of metal. The drugs are not wrapped to offer any concealment they are simply in clear plastic.

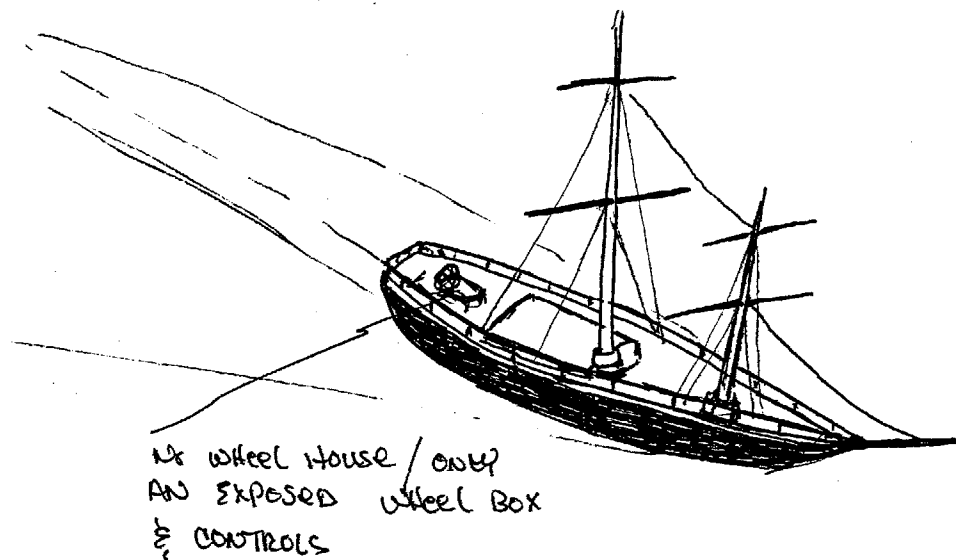

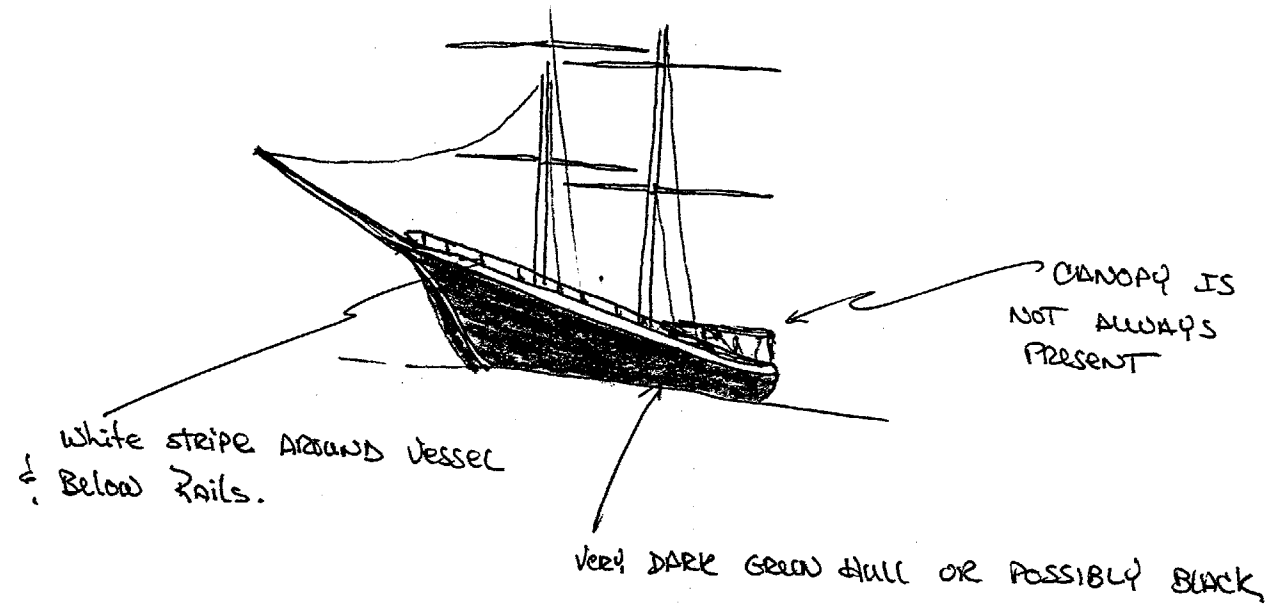

The ship is presently located in the Atlantic (See tracing sketch).

The ship has a control wheel (wheel box) to the rear of the vessel. It looks like an older wheel but the vessel reminds me of a more modern type. The design of the vessel's hull looks sleek, and looks like it is made of fiberglass. The vessel looks like it is 5 or 6 meters wide, with a fairly deep draft -- due to the keel.

SUMMARY OF INFORMATION

The vessel is a long, flat, black vessel with a boxy structure near the stern. The vessel is carrying medium sized, flat ended cylindrical containers. These are less than 2 feet high and less than 1.5 feet in diameter. The containers can only be opened once hence only a small fraction are checked by customs. The containers held a very thick liquid with solids (fist sized & smaller) suspended in it. The vessel is carrying a number of these containers which are arranged on rows on board. The contraband is hidden some of these containers. It is white, solid and in plastic bags the size of 2-5 lb sugar bags. One of these bags is in the bottom of a number of these cylindrical containers. Less than 1/3 of the containers have contraband in them. When looking at the arrangement of cylinders the second container from starboard in the second row from the bow has contraband in it. The containers containing contraband are (look, weight, labels, marks etc.) identical to those which don't. The only way anyone can tell which contains contraband is by how they are arranged on board.
